

TROPICAL LIFE – VILLA MANA

Edition May – August 2011

Villa Mana

Would you like to stay in front of beautiful rice fields with no traffic noise and to hear simply the sounds of birds and a cool breeze? I recently discovered a magical place in the Canggu area and surprisingly, behind the high walls, a modern tropical style villa has been built; definitely a perfect choice for a serene holiday getaway.

As you step into the villa, you immediately notice the floors are created with continuous poured black concrete spreading throughout the villa; resulting in a modern and 'edgy' look. When it comes to the interior, modern and minimalist custom designed furniture dominates the interior and it utilises a combination of stone, wood and glass for the walls in order to create a warm yet elegant ambiance. Villa Mana has 6 bedrooms, an 18x6 metre infinity pool overlooking the fabulous rice fields, a massive open-air rooftop deck, which is a wonderful spot for sunset, and a huge lawn suitable for outdoor parties.

For those who come to this villa, all eyes will be drawn not only to the innovative architectural and interior design but also the vision of Bali's breathtaking famous rice terrace, stunning surroundings and natural beauty.
